

Bug Report 1

Bug Report ID: BR-001

Reported By: Atif Khattak

Date: 25 September 2025

Project Name: Instagram App Testing

Module: Login Functionality

Severity: High

Priority: High

Environment: Android 13 / Chrome Browser / App Version 250.0.0.12.117

Tested On: Manual Testing

1. Bug Summary

Login fails when valid credentials are entered, showing an incorrect error message.

2. Steps to Reproduce

1. Open Instagram application.
2. Navigate to the login page.
3. Enter a valid username and password.
4. Click the **Login** button.

3. Expected Result

User should be successfully logged in and redirected to the home feed.

4. Actual Result

Login fails with error message:

"Invalid username or password" even when credentials are correct.

5. Screenshots / Evidence

(Attach screenshots or screen recordings showing the issue.)

6. Bug Severity and Priority

- **Severity:** High — affects core login functionality.
- **Priority:** High — must be fixed before release.

7. Status

New — Bug logged and awaiting developer review.

8. Additional Notes

- Tested on multiple devices and browsers — issue is consistent.
- Network connection stable during testing.
- No similar bugs found in other modules.

9. Suggested Fix

Check authentication API and error handling logic for login requests.

Bug Report 2

Bug Report ID: BR-002

Reported By: Atif Khattak

Date: 25 September 2025

Project Name: Instagram App Testing

Module: Photo Upload

Severity: Medium

Priority: Medium

Environment: iOS 16 / Safari / App Version 250.0.0.12.117

Tested On: Manual Testing

1. Bug Summary

Photo upload fails intermittently when using the app on iOS devices.

2. Steps to Reproduce

1. Open Instagram app on iOS device.
2. Navigate to the photo upload section.
3. Select a photo and click **Upload**.
4. Observe the upload status.

3. Expected Result

Photo should upload successfully without errors.

4. Actual Result

Upload fails with the message: *"Unable to upload photo, please try again."* This occurs randomly.

5. Screenshots / Evidence

(Attach screenshots or screen recordings showing the issue.)

6. Bug Severity and Priority

- **Severity:** Medium — affects user experience.
- **Priority:** Medium — should be fixed in upcoming patch.

7. Status

New — awaiting developer review.

8. Additional Notes

- Occurs only on iOS devices.
- Works fine on Android devices.

9. Suggested Fix

Check the photo upload API and compatibility with iOS devices.

Bug Report 3

Bug Report ID: BR-003

Reported By: Atif Khattak

Date: 25 September 2025

Project Name: Instagram App Testing

Module: Search Functionality

Severity: Low

Priority: Low

Environment: Windows 11 / Chrome Browser

Tested On: Manual Testing

1. Bug Summary

Search suggestions sometimes take longer than expected to load.

2. Steps to Reproduce

1. Open Instagram web version.
2. Click on the search bar.
3. Enter any keyword.
4. Observe the suggestion dropdown.

3. Expected Result

Search suggestions should load instantly.

4. Actual Result

Search suggestions appear with a delay of 5–7 seconds.

5. Screenshots / Evidence

(Attach screenshots or screen recordings showing the delay.)

6. Bug Severity and Priority

- **Severity:** Low — does not break functionality but affects performance.
- **Priority:** Low — improvement recommended.

7. Status

New — logged for performance review.

8. Additional Notes

- Delay occurs intermittently.
- Internet connection speed tested and stable.

9. Suggested Fix

Optimize search query performance and caching mechanism.

Bug Report 4

Bug Report ID: BR-004

Reported By: Atif Khattak

Date: 25 September 2025

Project Name: Instagram App Testing

Module: Notifications

Severity: Medium

Priority: Medium

Environment: Android 13 / Instagram App Version 250.0.0.12.117

Tested On: Manual Testing

1. Bug Summary

Push notifications are delayed by 10–15 minutes.

2. Steps to Reproduce

1. Enable push notifications in Instagram app settings.
2. Send a message or receive a like on a post.
3. Observe notification arrival time.

3. Expected Result

Push notifications should be received instantly.

4. Actual Result

Push notifications appear with a delay.

5. Screenshots / Evidence

(Attach screenshots or screen recordings showing delay.)

6. Bug Severity and Priority

- **Severity:** Medium — affects user engagement.
- **Priority:** Medium — should be fixed in upcoming updates.

7. Status

New — logged for investigation.

8. Additional Notes

- Delay occurs randomly.
- Tested on multiple devices.

9. Suggested Fix

Check push notification service latency and server performance.
